

Engine Supplier Evaluation Checklist

Use this checklist to evaluate and compare engine suppliers based on quality, capacity, service, and overall reliability. Score each criterion from 1 (Poor) to 10 (Excellent).

Criteria	Weight (%)	Score (1-10)	Weighted Score
Quality Certifications & Defect Rate	25		
Production Capacity & Flexibility	15		
Cost & Total Value	20		
Delivery Performance	10		
Technical Support / R&D	15		
After-Sales Service	10		
Financial Stability	5		
Total	100		

Tip: Add up all weighted scores to calculate the total supplier rating. A total score above 8.0 generally indicates a strong and reliable supplier.
